

QUICK RULES

A refresher, not the rulebook — cards and the board show full specifics when you play.

GOAL

- Build properties, play action cards, and collect income. Win by timing the **Final Round** and out-scoring rivals.

YOUR TURN

- Your hand holds **5 property cards** and **5 action cards** at all times. Play begins with drawing 2 additional action cards; play ends by drawing back up to 5 property cards.
- **3 actions** per turn: 1 build + 2 others, or 0 builds + 3 actions.
- A successful **Rezoning** counts as 2 actions (build included); a failed one costs 1.
- Only **one Income** action per turn.
- Hand may not exceed 8 at the conclusion of your turn — it may exceed 8 mid-turn.

ANCHOR TENETS

- Center lot of every block. Reach is **citywide (G)** or **block-only (B)** per its printed rules; multiple built copies stack.
- Anchor Tenets add additional monetary value and influence to their block and city, based on the various property values.
- **Scandal** or a successful **Police Raid** overthrows an Anchor Tenet — the lot vacates and can be reclaimed.

AGAINST OPPONENTS

- **Hostile Takeover**, **Rezoning**, and **Remove Investors** are modified by the relevant Anchor Tenets.
- City Hall, Courthouse, or Police: **+1 max** on Freeze and Police Raid rolls.
- Influencer and/or News Outlet: **+1 max** on Scandal rolls.

CALAMITY

- Plays itself the instant it's drawn — at most once every 7 rounds.
- Every founder rolls in turn order starting with the drawer: lose **5–30%** of cash (5% per pip). Cannot be overturned.

BONUSES

- **\$50M** + naming rights for a fully-owned 3×3 city block.
- **\$30M** + naming rights for a 6-lot straight run (3+3) along a street.

END GAME

- **12 adjacent properties** owned by the same player makes the **Final Round** available — only that player may declare it, on their own turn.
- **Declaring** starts it immediately: every other founder gets one more turn, and the declaring player also gets one more turn, then final scoring (Squares & Streets).
- The eligible player has up to **4 of their own turns** to declare. If they haven't declared by the end of their 4th turn, the game **ends immediately** at that point — no bonus round for anyone else.

Card play and board highlights show the specific rule for that play — use this sheet as a refresher only.
